DETAILED ACTION

1. In the preliminary amendment, claims 1, 4-9, 16, 17 and 24 have been amended, claims 12-15 and 18-23 have been cancelled, and new claims 27 and 28 have been added. Therefore, claims 1-11, 16, 17 and 24-28 are pending. Claim 26 is an improper dependent claim because it depends from a multiple dependent claim (claim 7) and a cancelled claim (claim 15), it is applicant's discretion to amend this claim.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U. S. C. 121:

I. Claims 1-7, 16 and 17, drawn to a DJ11 polypeptide comprising a Kunitz-type protease inhibitor domain or a biologically active portion thereof, classified in class 530, subclass 300.

II. Claims 8-11 and 24-28, drawn to a nucleic acid encoding a DJ11 polypeptide or a biologically active fragment thereof, or an expression cassette comprising the nucleic acid, classified in class 536, subclass 23.1, and class 435, subclass 320.1.

Should Group II be elected, applicant is required to select one nucleotide sequence (SEQ ID NO: 3, 8 or 11) from claim 9. Each nucleotide, which contains different nucleotide sequence and encodes different peptide sequence, is patentably distinct. This is not species election.

2. The inventions are distinct, each from the other because of the following reasons:

The polynucleotide of Invention II is related to the protein of Invention I because the polynucleotide encodes the claimed proteins. The inventions are distinct because they are physically and functionally distinct chemical entities, and the protein can be made by another

Art Unit: 1656

and materially different process, such as chemical peptide synthesis. Further, the polynucleotide may be used for process other than the production of the proteins, such as nucleotide hybridization assay.

Because Inventions I-II are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, and because each invention requires different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
